

LINX CAST

Android Phone Adaptor

Model: MH-2500

INTRODUCTION

Congratulations on your purchase of the MH-2500 Android Phone Adaptor. Your satisfaction is very important to us.

The MH-2500 allows you to send image or video on your Smartphone to a HDTV. Anything shows on the Smartphone will also show on the HDTV. User can get reliable HD signal transmission with MH-2500 MHL to smartphone to TV converter.

MH-2500 supports power charge function to Smartphone. Users will not worry the Smartphone to run out of power when display video and picture to HDTV.

MH-2500 is designed with enhanced RCP function, which can be operated by using R/C of TV with CEC function (CEC needs to be enabled). Users can experience much better control when using the Smartphone.

FEATURES

For the best performance of this Android Phone Adaptor, please read this manual carefully and keep it for further information.

pin 5 to pin 11

CONNECTION ILLUSTRATION

Connection step

- (1) Connect HDMI cable from MHL dongle to TV.
- (2) Connect the power.
- (3) Connect Smartphone to MHL dongle.

Notice:

If the connected USB port on HDTV can not supply enough power, please use the Smartphone's power adaptor for powering and charging to Smartphone.

ATTENTIONS

1. MHL connector is same as Micro USB connector. But not all Smartphone can support MHL output. Please make sure the Smartphone that you try to use with MH-2500 can support MHL output.
2. Some MHL Smartphone may not support MHL RCP function or only have limit support on MHL RCP function. When you try to use the remote controller of TV to control the Smartphone, the remote control function may not function well.
3. Some APPs may not support MHL RCP function or only have limit support on MHL RCP function. When you try to use the remote controller of TV to control the Smartphone, the remote control function may not function well.
4. If the connected USB port on HDTV can not supply enough power, please connect to the USB port that is for hard drive connection OR use the Smartphone's power adaptor for powering and charging to Smartphone.

5. Do I have MHL - enabled smartphone?

Scan the QR code to find out.

TROUBLE SHOOTING

1. When there is no picture presented, please:
 - Check if the HDMI cables are high speed supported. (For resolution up to 1080p high speed HDMI cables are required.)
 - Check all the connection is correct and all connectors are connected well.
 - Check the quality of connected HDMI cable, and make sure the cable does not damage.
2. When use the remote controller of TV for Smartphone control, it is not function?
 - The Smartphone may not support MHL RCP function.
 - Some APPs may not support MHL RCP function well. You may provide feedback to the APP provider.
3. When there is only picture displayed and without sound:
 - Check the volume of the phone; make sure the volume setting is right.
 - Check all the connection is correct and all connectors connect well.
 - Check your cable to see if it is damaged.
